

Once again The Association has sponsored \$60 prizes at each regional Science and Technology Fair and coordinated prizes from Statistics New Zealand to make the total prize worth \$100 in addition to certificates. 22 Fairs were sponsored and all are very appreciative of our sponsorship. This is an excellent way of promoting ourselves to a wider audience and showing that statistics can be a career path.

The relationship with Statistics New Zealand has improved markedly over the last couple of years, inevitably this is due to the personal involved, long may this continue.

If anyone was looking for a job to take up I would gladly pass this one on.
