

Report for the Science Fairs

Once again we have sponsored and organised the prizes for the Regional Science and Technology Fairs around the country. These occur between July and October and we have given a \$60 prize to each on along with sponsorship from Statistics New Zealand which is \$40 in book tokens and some merit certificates. There were 22 Fairs this year and all were very appreciative of our donation of prizes although some suggested the value was a little low.

Where possible members of the Association attend the Fairs and judge the prizes and I would like to thank those who carry out this task very much.

I hope that the Association will continue to support this activity as a good way to advertise ourselves to a wider audience.

I would also like to make my annual offer to step down from this august position if there was someone else willing to pick it up.

Alasdair Noble
