

## Science Fairs Report to the 2020 AGM

We withdrew from sponsorship of the Regional Science and Technology Fairs this year because in May when decisions had to be made there was considerable uncertainty as to whether they would go ahead. As it happened many did go ahead some in various guises but we did not support them as it would have meant supporting some and not others. Organisers understood our position and we intend to return to supporting the Fairs in 2021. It is likely that this will be without the support of Statistics New Zealand and Executive has indicated a willingness to increase our contribution to each fair to \$100 and to supply certificates.
