

R users group report

10 November 2022

Prepared by Shirley Wu

The Auckland R users group currently has 1,364 members, organising meetings have been challenging this year due to Covid risks.

The Wellington R users group currently has 431 members. Dr Uli Muellner from Epi-interactive has put in an amazing effort in organising meetings this year. In November, Asheel Ramanlal and Nick Snellgrove talked to the group about human centred data science and pushing the boundaries in the cloud with R and Python. In May, Uli hosted an R exchange meeting to facilitate discussions and learnings on how to make the most out of R in the community.
