

Webmaster Report – AGM – 8 December 2025

This year we changed our email host provider to CrazyDomains who took over Freeparking, our former provider. We now have 75 GB storage and the ability to create 75 email accounts. We have paid for 2 years, and we will re-evaluate how things are going when that time is close to being up.

There have been a variety of updates throughout the year, and I continue to strive to make improvements to the website.

Thank you to the people that sent through updates and suggestions. Please continue to let me know when you notice anything that needs fixing.
